

## Job Description - Intermediate+ Web-Application Programmer

Outcrop Yukon is looking for a highly motivated intermediate+ Web-Application Developer. In this mid-level position you will be involved with projects from inception to delivery, with the opportunity to make a difference. You will be working on presentation and middle tiers of simple to complex web applications using a variety of tools and languages, including XHTML, JavaScript, DHTML, Java, C#, ASP.Net, PHP, XML, XSLT, Visual Studio.Net, MS SQL Server, MySql and Oracle.

### Responsibilities Include:

- Consulting with other team members to understand business problems
- Analyzing, designing, and coding solutions
- Providing input and ideas for web trends and technologies
- Contributing positive team and development skills to advance our programming staff
- Developing functionality for the front- and back-end of n-tier web applications using a variety of tools and languages

### The Ideal Candidate Will:

- Have 3-5 years of professional programming experience, including at least 3 years of Web development experience. Applicant must have some professional experience using C# and/or Java
- Have a portfolio of recent work
- Have extensive experience with OOP techniques
- Ideally have professional experience with the following:
  - XML Web Services
  - ASP.Net
  - XML/XSLT
  - CSS
  - JavaScript
  - HTML 4 + XHTML 1

### Benefits

Outcrop Yukon offers competitive salaries, excellent benefits package, bonus potential and career advancement opportunities.

### Working Environment

Outcrop Yukon's working environment is best described as dynamic, energetic, inclusive, enthusiastic, and friendly.
